AKOKA, LG , 100213, NIGERIA

PROFILE

Passionate Python Developer with experience in building web applications and software. Proficient in Fullstack Development, Python Scripting, Automation, Web Scraping, Artificial Intelligence (AI), Machine Learning (ML), Algorithm, and Simulation.

WORK EXPERIENCE

Operations Associate at International Hub , Ontario , CA

(September 2020 – Present)

International Hub is an online community and database that contains sourced opportunities that equip both Canadian and International students. As an Operations Associate, I provide support on the efficiency of daily business operations. My daily responsibilities include :

- › Maintaining and updating SQLite database functionality with Python.
- › Scheduling and performing team collaborations on documenting new processes, findings on environments, and shift handoff.
- › Providing technical support to clients across the company's platform
- › Monitoring and tracking hours and tasks of associates on Asana and other project management tools.
- › Troubleshooting, remediating and also triaging operational incidence on a case by case basis.
- › Organizing and contributing to the organizational body of knowledge in Python scripting on Discord.

Website Designer Intern at TPCL , Lagos , NG

(October 2020 - June 2021)

As a Website Designer at The Plenipotent Company Limited, I developed website for client using WordPress and its plugins. A view of my accomplishments are as follows:

- › Leveraged stakeholders knowledge on business requirements to deploy initial version of the company's cooperate websites.
- › Provided a Python script as part of my final internship projects for continuous improvements of the company's website. The intention of the scripts is for enabling automated testing, configuration management, and release management.

IT Analyst at E-Wealth Computer Institute , Lagos , NG

(March 2015 - July 2017)

My accomplishments were:

- › Designed IT solutions and solving issues effectively by testing.
- › Built scripts that fetch job offers from the Web and displays relevant information using BeautifulSoup.
- › Identified risks, opportunities, faults, and areas for development within the company's IT framework.
- › Integrated multiple systems and reconcile needs of different teams.
- › Coordinated developers to build and implement technology solutions while also providing advice and technical training.
- › Analyzed IT systems and processes with pandas based on statistics.
